

Section 21 - Adaptive Management

Sub-Topic	Plan Reference	Feedback
Plan Evaluation	21.10	Adaptive Management – 21.10 volunteer committee overseen by Council
General Comment – Other		Basis of plan – continued growth what if growth does not continue or population contracts
General Comment – Other		Excellent! I look forward to the first public reporting as per policy 21.9.
General Comment – Other		The frequency of OCP review will have to increase as the population density grows. Canada in general and lower BC in particular may be the haven for hugh numbers of third world countries within the next 40 years.
General Comment – Other		Be sure to use clear, demanding, unequivocal language when doing monitoring and evaluation. We need to more than "encourage". We probably need to mandate many behaviours. We all need and want to see RESULTS. Starting immediately. I'd like to know how to receive the annual status reports. How will citizens be involved? Too bad most folks aren't as passionate about responding to climate change and energy depletion as they are around hockey finals!
